Guest Speakers:

The presenters were from Cal Water. They were Rashmi Kashyap, Project Engineer, and Tony Carrasco, District Manager. The presentation did not cover the recently completed Cal Water urban water plan. The presentation focused on the capital improvements taking place on the 6.5 acre Cal Water property on 28th avenue. The improvements include the installation of (1) new 2.5M gallon and (1) new 1.0M gallon water storage tanks. Currently there are two water storage tanks on the property. The need for the installation of the two new tanks is to ensure adequate water access for up to five days following a planned (i.e. scheduled maintenance) or unplanned emergency (i.e. earthquake).

The timeline of events is as follows. 2011 will include public outreach, completion of storage design and securing the required permits. 2012 will include the start and finish of the installation. Water rates will not be impacted as a result of installation.

The general meeting was adjourned at 8:50pm.
